

Notes + Action Items Progress Check 1

For Rachel:

- Provide the specific St. Thomas brand hex codes and the "Sustainability St. Thomas" logo
- Send additional images/decals for specific items, particularly those related to the AARC (Athletic Center).
- Send higher-quality photos of specific buildings

For the team:

- Move the active bin icon from Aquinas Hall to the OSF Library to better reflect student traffic.
- Add Frey Hall as a game map
- Implement Location-Specific Items: Customize the trash items based on the building type:
 - AARC: Popcorn containers and concession items.
 - ASC: Food related items, takeout containers, cutlery, and napkins
 - Frey Hall: Food scraps, light bulbs, batteries, and shampoo/toiletry bottles.
 - Library/Classrooms (OEC/McNeely): Office paper, cardboard, snack wrappers, pop cans, and gum.
- Refine Feedback System:
 - Replace or supplement the mistake counter with a visual, such as a red screen tint for errors.
 - Develop a review screen at the end of each level to provide detailed explanations of mistakes without disrupting gameplay. Or have a pop-up during gameplay that corrects the mistake
 - Add an optional sound cue for right/wrong actions as a bonus feature.
- Accessibility Review: Run the design through an accessibility checker (like Adobe) to ensure high contrast, such as white text on dark backgrounds.
